ABOUT THE FILTER

The air purifier uses a 3-stage filtration system to purify air.

A. **Nylon Pre-Filter**

- Captures large particles such as dust, lint, fibres, hair, and pet fur.
- Maximises the Filter's life by protecting it.

B. **Main Filter**

- 99.97% filtration efficiency for 0.1-0.3μm airborne particulates, including pollen, dust, and animal dander allergens"
- Traps small particles such as mould spores, fine dust, smoke particles, bacteria and viruses*, and allergens such as pollen, dust mites, and pet dander.

C. **High-Efficiency Activated Carbon Filter**

- Physically adsorbs smoke, odours, and fumes.
- Filters compounds such as formaldehyde, benzene, ammonia, hydrogen sulphide and volatile organic compounds (VOCs).

*Main Filter can remove most viruses and bacteria from the air, but cannot fully remove them from your environment. Air purifiers cannot prevent an infected person from spreading an infection, and cannot remove bacteria and viruses from surfaces. Please use this air purifier together with other precautions.

Clean Air Delivery Rate

This air purifier has a Clean Air Delivery Rate of 110 cubic feet per minute (CFM), or 152 m^3/h.

Clean Air Delivery Rate (CADR) measures the efficiency of an air purifier by indicating the volume of clean air that it produces per minute. This is based on removal of dust, pollen, and smoke, which are the 3 most common indoor air pollutants. The higher the CADR, the more particles the air purifier will remove and the larger the area it can clean. The rating is measured at the air purifier's highest speed.

Air Change per Hour

The air change rate is how many times all of the air in a room can be purified (or "changed") by the air purifier in 1 hour. Air changes per hour are calculated on the recommended room size, assuming 2.4 m / 8 ft ceilings. For smaller rooms, the air change per hour will increase. This air purifier has an air change per hour of 2, which means it can change air 2 times per hour at the max speed in a single, closed room. The air purifier is effective for larger rooms, but air purification will take longer, with fewer air changes per hour.

> **Note:** *To effectively clean air, keep windows and doors closed while the air purifier is on.*

Humidity

Moisture may damage the filters. This air purifier should be used in an area with a humidity level below 85% RH. If you use the air purifier in excessively humid areas, the surface of the filter will become mouldy.

> **Note:** *Water or moisture will allow mould to grow. To solve a mould problem, get rid of the source of the moisture and clean up the mould. Air purifiers cannot solve an existing mould problem, only capture airborne mould spores and reduce odours.*

Essential Oils

Do not add essential oils to the air purifier or filter. The filter will become damaged by the oil and will eventually release an unpleasant smell. **Do not** use diffusers near the air purifier.

CARE & MAINTENANCE

Cleaning the Smart Air Purifier

- Unplug before cleaning.
- Wipe the outside of the air purifier with a soft, dry cloth. If necessary, wipe the housing with a damp cloth, then immediately dry.
- Vacuum the inside of the air purifier.
- **Do not** clean with abrasive chemicals or flammable cleaning agents.

Check Filter Indicator

will light up as a reminder to check the filter. Depending on how often you use the air purifier, the indicator should turn on within 6–8 months. You may not need to replace your filter yet, but you should check it when turns on.

> **Note:** *When your air purifier is set up with the VeSync app, you can also check the app to see your remaining filter life. You will also receive a notification from VeSync when it's time to check your filter.*

Cleaning the Filter

The outer pre-filter should be cleaned every 2–4 weeks to increase efficiency and extend the life of your filter. Clean the pre-filter using a soft brush or vacuum hose to remove hair, dust, and large particles. **Do not** clean the filter with water or other liquids. *[Figure 3.1]*

Resetting the Check Filter Indicator

Reset the Check Filter Indicator when:

A. lights up red.

1. Replace the filter (see page 15).
2. Turn on the air purifier.
3. Press and hold for 3 seconds. will blink 3 times and turn off once successfully reset.

B. The filter was changed before lit up.

3. Press and hold for 3 seconds. will blink 3 times and turn off once successfully reset.

> **Note:** *You can also reset the Check Filter Indicator in the VeSync app.*

When Should I Replace the Filter?

Check the VeSync app to see your remaining filter life.

The filter should be replaced every 6–8 months. You may need to replace your filter sooner or later depending on how often you use your air purifier. Using your air purifier in an environment with relatively high pollution may mean you will need to replace the filter more often, even if is off.

You may need to replace your filter if you notice:

- Increased noise when the air purifier is on
- Decreased airflow
- Unusual odours
- A visibly clogged filter

Note:

- To buy replacement filters, go to the official store of the e-commerce platform, if you have questions, please contact **Customer Support** (see page 21).
- Remember to reset after changing the filter (see page 14).

Replacing the Filter

1. Unplug the air purifier. Flip the air purifier over and remove the filter cover (see **Getting Started**, page 8).
2. Remove the old filter.
3. Clean out any remaining dust or hair inside the air purifier using a vacuum hose. **Do not** use water or liquids to clean the air purifier. *[Figure 3.2]*
4. Unwrap the new filter and place it into the housing (see **Getting Started**, page 8).
5. Replace the cover. Plug in the air purifier.
6. Reset the Check Filter Indicator (see page 14).

VESYNC APP TROUBLESHOOTING

My smart air purifier isn't connecting to the VeSync app.

- Make sure your phone has Bluetooth® turned on and is not currently connected to another Bluetooth device.
- During the setup process, you must be on a secure 2.4GHz Wi-Fi network. Confirm that the network is working correctly.
- Make sure the Wi-Fi password you entered is correct.
  - There should be no spaces at the beginning or end of the password.
  - Test the password by connecting a different electronic device to the router.
  - If you're manually typing in the SSID and password, double check that both are entered correctly.
- Try moving your air purifier closer to the router. Your phone should be as close as possible to your air purifier.
- Your router may need to be at a higher location, away from obstructions.
- Make sure your air purifier and router are away from appliances (such as microwave ovens, refrigerators, electronic devices, etc.) to avoid signal interference.
- If you're using a VPN, make sure it's turned off while setting up your air purifier.
- Disable portal authentication for your Wi-Fi network. If portal authentication is enabled, the air purifier will not be able to access your Wi-Fi network, and setup will fail.

Note: *Portal authentication means that you need to sign in to your Wi-Fi network through a web page before you can use the Internet.*

My air purifier is offline.

- Make sure the air purifier is plugged in and has power, then refresh the VeSync menu by swiping down on the screen.
- Make sure your router is connected to the internet and your phone's network connection is working.
- Delete the offline air purifier from the VeSync app. Swipe left (iOS®) or press and hold (Android™), then tap **Delete**.
- Reconfigure the air purifier with the VeSync app.

Note: *Power outages, internet outages, or changing Wi-Fi routers may cause the air purifier to go offline.*
